Environmental Policy Statement

Hayley 247 Engineering Services Ltd is committed to protecting the environment by providing goods and services in an environmentally responsible way including the prevention of pollution and the recycling of materials. The Company is further committed to ISO14001:2015 along with fulfilling its compliance obligations and is also committed to the continual improvement of the Environmental Management System to enhance environmental performance and reduce process impacts upon the environment.

We commit to assess our working procedures and methods of manufacture to improve and reduce wherever possible any detrimental effect goods or services supplied by The Company have on the environment.

This assessment and subsequent action will take into account of but not be limited to:

- **Use and disposal of goods, including all components and raw materials.**
- **Effects of services including training, operations and consultancy.**
- **Existing and prospective standards relating to environmental matters including but not limited to those currently issued by the Health & Safety Executive.**
- **Use of items which can be recycled or re-used.**
- **Efficient use of energy resources.**
- **Identification of any potential environmental harmful processes or materials.**
- **Commitment from suppliers to The Company for the supply of goods or services in an environmentally responsible way.**
If any further information is required regarding The Company Environmental Policy please don't hesitate to contact the main office.
